CURATIVE MAGNETISM.

THE reasons why Electricity or Magnetism, or its modifications, claims a place as an active agent in the cure and relief of various diseases are—

1st. That in every action in life it is either an active agent in its production, or is one of the products evolved from the result.

2nd. That between the nervous force and this principle there is a close analogy, both in its phenomena and in its mode of action.

3rd. That the muscles of our bodies are supplied with Electric currents, whereby their muscular power and energy are sustained.

4th. That these currents, under great muscular exertion carried to fatigue, become exhausted, passing from their inner to the outer surfaces, thence through the skin.

5th. That in the air we breathe it is at all times present, and performs an important part in the lungs in the function of respiration.

6th. That in every chemical change Electricity is evolved, or is an agent in producing the change.

7th. That heat and light are at all times impregnated with it.

8th. That in the performance of the functions of digestion and assimilation, there are continuous currents passing between the stomach, liver, kidneys, and the skin.

9th. That our bodies are at all times sensibly affected by its atmospherical changes from a healthy or natural quantity to that of superabundance or deficiency.

10th. That it is a great agent of organic life.

11th. That the Magnetic force of the iron in the blood is the motive power which gives circulation, and thus maintains life.

Magnetic Appliances impart additional Magnetic power to the iron in the blood; as a consequence, we have a better circulation and greater purity of the blood, together with increased nervous force in the weakened, diseased, and debilitated system. Magnetism, in fact, imparts the strength and tone which by many is supposed to be given by alcohol, but without any of the after exhausting effects of stimulants. Though so potent in its effects, its action is so gentle that the Appliances which are made up with the Magnetic power inserted in silk, flannel, velvet, or other suitable materials, may be worn with perfect safety by a little child or the most delicate invalid.

The following letter, from Professor Hagarty, the well-known Canadian lecturer, will be read with interest by those who remember his genial and instructive lectures in Canada and the Northern States:

"20, Hampstead Road, Elm Park,
"Liverpool, 18th October, 1877.

"Dear Mr. Mason,—I am very pleased to hear that you have at last decided to introduce Curative Magnetism into Canada and the States. I have long been convinced that, successful as the invention and application of Magnetic appliances have been in this country, the climate of Canada and the Northern States, with much greater extremes of heat and cold, would indicate their being of far greater advantage there than in England, and I have often wished that I could be one of the pioneers in introducing them. You, who have had some years' experience in applying and recommending Magnetism in England, know what it has done and is doing as a curative agent; and we both know, from many years' residence in Canada, that there are a few diseases incidental to the Northern part of America which seem to completely baffle ordinary medical skill, Consumption and Lung Complaints being among the principal. If Magnetism were generally applied there for these complaints alone, it would be a magnificent boon, and would save thousands of lives. There are so many cases constantly occurring here of its advantages, that I can speak confidently; and I know that the various types of Consumption are as prevalent, or more prevalent, there than they are in England. Again, in the treatment of Liver Complaints and Indigestion, there is nothing to equal Magnetism. The Englishman's liver is generally in a state of chronic disorder; but I find that a Magnetic Belt generally stops his grumbling, and makes him confess that there's virtue in other things besides his blue-pill and alteratives. I have had no cases here of fever and ague; but from the gently stimu-

lating influence of Magnetism, I think you will find in such cases over in America it will far exceed quinine and other tonics; and if all aguish subjects could be induced to wear a strong Belt and Spine Band, their shaking days would be over. You will find in all these derangements, resulting from a loss of animal Magnetic heat, that you can safely recommend Magnetism, and in Rheumatism and Lumbago it is as near infallibility as any remedy can be. The thing is, to persuade your patient not to practice a false economy by not having sufficient. I have yet to learn that Magnetism does any harm even in those isolated cases where it does no good, or no apparent good.

"All persons with delicate constitutions should use it as a preventive to actual disease; and thus used, it will do more than any medicine possibly can.

"As I know Canada so well, I am pleased that a Canadian has undertaken the task of introducing Magnetism; and I am certain that the inventor could not have chosen one better fitted than yourself to represent his interests there. If circumstances permitted, I should dearly love to make another lecturing tour through the North, and assist you by speaking on Magnetism, as I am satisfied it is the most valuable discovery (in a curative sense) of modern times; but that pleasure I must defer for the present, though I had resolved, If I ever did return, to make a special thing of introducing magnetism. But as I am not at present going, I am pleased that your are; and I trust you will find no serious difficulty in carrying out the good work you have undertaken.

"I remain, with sincerest wishes,

"Yours faithfully,

"A. HAGARTY."

TO THE MEDICAL PROFESSION.

ALTHOUGH this pamphlet is intended for the general public, I cannot refrain from making a special appeal to the Medical Profession. It is to them we all naturally look, not only to restore us to health, but also to suggest the remedies most likely to protect us against the attacks of disease. For years I have, in my various pamphlets, been asserting that Magnetism is a great curative agent. I will here put it more positively and specifically; Rheumatism, Asthma, Bronchitis, Tumours, Dropsy, Constipation, Debility, and many other complaints, can, as a rule, be more readily cured by means of Magnetism than by any other remedy. This statement is either false or true; if false, it should be at once exposed; but if true, then Magnetism, as a means of curing and preventing disease, should be accepted by the Profession. I am not now arguing in favour of "The Magneticon;" the question, whether my patent is superior to any other, is a mere side issue, affecting only myself. The subject to which I desire to direct the special atten-

tion of the Medical Profession is MAGNETISM; and if it will cure disease and prolong life, no mere feeling of professional etiquette should stand in the way of its general adoption. I do not, however, assert that Magnetism will cure anything and everything; and upon this point I desire to be very explicit. My statement is that it possesses great curative properties; and I now invite the most searching investigation from the Profession; a more crucial test it would be impossible to apply, yet I have no fear of the result.

In appealing thus directly to the Medical Profession I trust I shall not be misunderstood. I should much regret creating an impression that the members of the Profession are opposing me; on the contrary, many have, by recommending their patients to try my Appliances, rendered me valuable assistance. My object is, if possible, to cause an inquiry to be made into the whole subject of Magnetism, as applied to the cure of disease, by those who are most competent to judge of its merits. Beyond the provisions of my Letters Patent, and the copyright title, "Magneticon," I have no wish to enjoy any monopoly in the application of Magnetism to the cure of disease; and should be only too pleased to see many others busily engaged in the good work of relieving human suffering.

48 Regent Street, London, W.,
November 15th, 1877.

EDGAR WETTON.

REFERENCES.

Those whose names and addresses are appended have kindly given us permission to publish the same, as a guarantee of the genuineness of "The Magneticon." Their reasons for testifying to the great curative properties of our Magnetic Appliances are derived either from their own experience, or from their knowledge of the benefit which others have received:

The Dowager Lady Palmer, Dorney Court, Windsor.
Charles F. Elcum, esq., m.r.c.s., l.s.a., Cheltenham.
The Rev. R. A. Knox, m.a., Rector of Shobrooke, Devon.

The Rev. J. C. Clarkson, Wellington St., Brantford, Ont.

The above are a few of the names given; others may be obtained at any time on application.

Cures by Magnetism in the West of England.

We would direct special attention to the following very important letter from Mr. I. S. Aplin, merchant, of Yeovil, which appeared in *The Daily Western Times* of the 22nd May, 1875.

PERSONAL EXPERIENCES OF THE POWER OF MAGNETISM.

To the Editor of "The Daily Western Times."

Sir,—Eighteen months since I was unacquainted with the power of Magnetism as a curative agent. It was then my good fortune to hear of Wetton's Patent "Magneticon" through Mr. Hagarty, who was lecturing here. This induced me to try it for myself and family. I had been a great sufferer, chiefly from lumbago, but in the course of a short time was completely restored, and my gene al health much improved by the use of Wetton's Magnetic Appliances, which are light and comfortable to wear, and can be put on and off without trouble or inconvenience.

Afflicted members of my family, as well as friends, having tried them with similar results, I felt it to be a duty to make known the healing powers of Magnetism to others, and in June, 1874, accepted an agency for the sale of the "Magneticon."

Since that time I have sold about three hundred Magneticon Appliances, and have not had a dozen complaints from the sufferers who purchased them.

On the occasion of Mr. Wetton's lecture on "Magnetism and Health," in the Town Hall, when the Rev. W. F. Wyndham, Vicar of Yeovil, presided, I briefly referred to the numerous cures which have been effected in this neighbourhood. I now address a wider circle, and appeal to my countrymen over the length and breadth of the United Kingdom to put faith in the healing power which has already been tried with such marked results.

A short enumeration of some of tne cases in which special benefit has been derived in Yeovil, Crewkerne, Chard, Ilminster, Axminster, Bournemouth, Blandford, Christchurch, Winchester, Bishopstoke, North Wootton, Sherborne, Bridport, Weymouth, Beaminster, and Salisbury, may not be tedious to those who have, perhaps, been striving in vain to allay pain or arrest the progress of disease.

A gentleman suffering from weak ankles was cured in a short time; another, prostrated by general weakness, found speedy relief by the use of a Belt and Spine Band. A minister of the gospel, who from nervous depression was unable to compose sermons, was soon restored; and the child of another minister cured of epileptic fits by the use of the Mag-

neticon. A young lady suffering from an overwrought brain is very much better; and a gentleman was cured of neuralgia in a few days merely by the use of the Spine Band. A grocer has been much relieved of general weakness; a dairywoman, afflicted with rheumatic pains across the loins, was completely cured by the use of a Belt and Spine Band. A young lady, after using a Lung Invigorator, has been saved from incipient consumption; and a farmer's daughter—a little delicate child of eight or ten years—is now strong, plump, and well. A gentleman, suffering from asthma, has been restored, and his wife relieved of rheumatic pains. A young man has been cured of a large swelling on the instep of long standing; a gentleman with varicose veins greatly relieved; and a poor woman, after using a Magneticon Belt, now suffers little from her old chronic rheumatism. A grocer, long afflicted with an internal complaint, was cured in about six weeks; a man relieved from an affection of his head by the use of a Spine Band and Belt. A lady, who, through a fall when a child, had received serious injury to her spine, which had affected her ever since, after wearing an Appliance for a month, derived the greatest benefit, in fact felt almost well. A gentleman, with rheumatism in the knee, has been quite cured; and a little girl also cured of bronchitis in three days. Her father, who had suffered from quinsey ten times, was induced to buy a Throat Protector, and has not had a return of quinsey during the late severe winter. A dairywoman was cured of varicose veins in a few weeks by a Leg Appliance, and her lungs greatly strengthened by a Lung Invigorator. A dairyman's daughter, who had returns of ulcerated throat every few weeks, has been completely cured. A lady, who had lost her voice for two weeks, was quite restored by a Lung Invigorator; another Lady cured of piles by a Belt. A gentleman, afflicted by paralysis, has been quite relieved; a gentleman farmer, who has been unable to ride on horseback for years, was well able to take such exercise after wearing a Belt for a few weeks; and a lady who had lost the use of her arm from paralysis, was quite cured in three months.

As an old resident of thirty years' standing in Yeovil, where I have been known among Christian workers, I am willing to authenticate with names, dates, and circumstances, any or all of the foregoing cases; and if my name and character, as a humble layman, are insufficient, can be supported in my testimony by the Rev. A. Morton Brown, LL.D., of Cheltenham; the Rev. R. A. Knox, M.A., Rector of Shobrooke, Devon; the Rev. J. Wilkinson, of Ventnor; the Rev. J. B. Talbot, founder of the Princess Louise Home, Wanstead; by members of the medical profession, and by several of the London City Missionaries.

Allow me before concluding, to add that not only does Magnetism cure disease; it strengthens the vital powers, and when worn by those in comparative health often wards off the insidious attacks of fever, consumption, small-pox, and many other "ills which flesh is heir to."

Yeovil. I. S. APLIN."

Since the publication of the above letter, Mr. Aplin has sold upwards of five hundred additional Appliances, and he still continues to receive the most satisfactory accounts respecting them.

THE CHEST AND THROAT.

In this country, where one is so susceptible to affections of the Chest and Throat, the wearing of Appliances that are constantly radiating a Magnetic power, which counteracts the adverse influences of an ever-changing atmosphere, is of the utmost importance. In cases of asthma, bronchitis, incipient consumption, severe and chronic coughs, &c., "The Magneticon" almost invariably effects a cure. Ministers of religion, public speakers, and singers, would find their voices much strengthened by the use of Magnetic Appliances. The Lung Invigorator, covering both the chest and upper portion of the back, is of almost infinite value in any case of weakness or disease of the lungs.

"Cheltenham, 14th April, 1874.

"For some time past I have used 'The Magneticon' Chest Protector and Belt, and feel grateful that I have done so. For years I have suffered considerably in winter from relaxed throat; but I am grateful to say that ever since I have worn these I have never had a momentary return of 'clerical throat.' I have also been greatly relieved from pain across my back. I can cordially recommend the use of the various Appliances, as the need may be, of 'The Magneticon.'

"A. Morton Brown, LL.D., *Minister of the Congregational Church.*"

"Newport, Isle of Wight, Dec. 15th, 1873.

"I cannot refrain from expressing the gratitude I feel for the great and speedy benefit I have derived from wearing your 'Magneticon' Chest Protector. I had been troubled with a cough the last three winters, and also with a feeling of great languor and fatigue; but after wearing your 'Magneticon' Chest Protector only three days, I quite lost my cough, nor have I once had a return of the lassitude which so depressed me before; indeed, I now enjoy long walks of many miles on a hilly country, which only ten days ago—that is, before wearing your 'Magneticon' Chest Protector—would have been utterly impossible for me to have accomplished. Gratitude for the great benefits I have derived from its use will always induce me to take every opportunity of recommending your invaluable Magneticon.'

Fanny S."

"P.S.—I have not given my surname, for I do not wish it published but shall be pleased to reply to any inquiries."

RHEUMATISM.

THERE are few complaints more difficult to remove by ordinary remedies than Rheumatism; none yield more readily to the soothing influence of Magnetism; and the rapidity with which a cure, or very considerable relief, is obtained is often almost incredible.

"2, Clarence Parade, Cheltenham, Nov. 26, 1875.

"Sir,—I have to thank you for your advice as to my Rheumatic affections. It is but right for me to mention that I have received great benefit from the Appliance I had from you; for several months back I could not cut up my food or carve, neither dress nor undress myself. In fact, I was miserable. Now, though the weather is very cold, I can help myself in every way, and guide my Bath-chair, &c. In fact, my friends, as well as myself, are astonished at the rapid recovery I have had since using your remedy. I am over seventy years of age. I hope many may try and be benefited by the curative power of 'The Magneticon.'

ELIZABETH GABBETT."

"16, Tavistock Street, Devonport.

"I feel it my duty to acquaint you of the speedy relief I have found in wearing your 'Magneticon' Knee-cap. If it continues as at present, I shall ever feel grateful that I had the privilege of hearing Mr. Hagarty speak so highly of its value in Rheumatism. I have been a great sufferer for more than three years through Rheumatism. I have suffered dreadful agony for weeks together. It has been painful for me to sit down in the chair, knowing the dreadful agony I should have in rising. But since I have worn your 10s. 6d. Knee-cap, only three weeks, I am very pleased to say I am almost free from pain. I had relief the first day I wore it.

"I am extremely anxious that my fellow-sufferers should know of this very excellent remedy which I have found, after everything else had failed. You are at liberty to make what use you please of this; and I do hope that the many hundreds who are suffering rheumatic pains, especially as I have in my knees and legs, will avail themselves of the unspeakable blessing of getting the 'Magneticon.' The best half-guinea that ever I spent.

R. CAWSEY."

"16, St. Ann's Terrace, Cheltenham, January 23rd, 1875.

"From an accident, when young, I have suffered all my life from severe Rheumatism in my back. I am now seventy-seven years of age, and for the last ten years have not (from pain in my back) been able to sit up long together. Colonel Hodson, of No. 25, Priory Street, kindly assisted me to procure one of your 'Magneticon' Belts, and the relief I have experienced is wonderful. I have *now* very little pain, and can sit up all day without inconvenience.

FANNY SMITH."

SPINAL WEAKNESS.

The spine being the centre of nerve power, the importance of applying Magnetism to that portion of the human system will be readily understood. The results that have followed the wearing of Spinal Appliances have been most gratifying. Even to those who enjoy comparatively good health, a "Magneticon" Spine Band would be most serviceable—its tendency being to give greater tone to the system, and prevent that feeling of weariness and depression to which so many are often subject. To those liable to paralytic or epileptic attacks, the application of Magnetism to the Spine is invaluable.

"Kingston Cross, Landport, Portsmouth,
Dec. 18th, 1873.

"I must express my great gratitude to you for having recommended me to use a 'Magneticon' Spine Band and Belt about five weeks ago. I consider my case as almost miraculous, as for nine years I had been an almost incessant sufferer with agonizing pains from spinal weakness, and great nervous debility. I had been treated by numerous doctors, and had taken medicine almost constantly; had undergone every kind of treatment which the most experienced medical men could suggest, but almost without the slightest relief; but now, after wearing the Appliances since the time you advised them, I am entirely free from my pains, my appetite is restored, and I have gained rapidly in flesh.

"The result has been such that it appears nothing short of a miracle. I am well known here—my husband, Henry Lillington, carrying on the boot and shoe business—and many of my friends and neighbours can testify to my wonderful restoration, for which I am thankful to God, who in His Providence has led me to the means of relief. I shall be only too glad to give any information to those who may wish to test that which has done me so much good.—Yours in gratitude,

"EMMA J. LILLINGTON."

"112, High Street, Cheltenham, May 17th, 1877.

"I have worn your belt, and with such efficacious results, that I consider it my duty to give this testimony as to the curative powers of 'Magnetism.'

"I only hope that others who similarly suffer may resort to the same means of relief, as I have every confidence in the result.

"J. WRIGHT."

For additional evidence of the value of Magnetic Appliances in the cure of Spinal Weakness, see General Testimonials, pages 11 *to* 24.

TESTIMONIALS.

As names and addresses are given in nearly the whole of the following Testimonials, their genuineness can easily be proved.

We have much pleasure in publishing the following letters from Mrs. and Miss Ellicott, the wife and daughter of the Bishop of Gloucester and Bristol.

EXTRACTS.

"Palace, Gloucester, Oct. 17th, 1876.

"Mrs. Ellicott has pleasure in testifying to the wonderfully strengthening effects of the Spine Band supplied to her daughter, and will take every opportunity of recommending 'The Magneticon' to her friends."

"Palace, Gloucester, Oct. 20th, 1876.

"Dear Sir,—Mrs. Ellicott wishes me to say that she will be happy for you to publish the extract from her note respecting 'The Magneticon' Spine Band supplied to me, from which I continue to derive the greatest benefit.—Believe me, yours faithfully, R. F. ELLICOTT."

MEDICAL TESTIMONIAL.

"Marlborough House, Ventnor, Isle of Wight, 28th Aug., 1874.

"Having since 1872 tested the efficacy of your Magnetic Appliances, by trying them upon many of my patients who suffered from complaints which the ordinary remedies failed to cure, I can speak much more positively as to their great curative properties than I did in my previous testimonial. It is therefore with every confidence that I recommend your 'Magneticon' Appliances to the notice of the Medical Profession.

"E. RUSSELL WOODFORD, M.D.,
"*Medical Officer of Health for Ventnor.*"

MEDICAL TESTIMONIAL.

"Acacia Lodge, Oxford, Oct. 4th, 1876.

"For some two or three years past I have been prescribing Magnetic Appliances, and find them invaluable in Chronic Asthma, Chronic Bronchitis, in Affections of the Spine, and other nervous disorders; and I have witnessed some remarkable recoveries after wearing them for some time.

"I am happy to find that Magnetism is making its way, and is held in such good repute in Cheltenham.

"ARTHUR GUINNESS, M.D., F.R.C.S.

Mr. Edgar Wetton, 98, High Street, Cheltenham."

MEDICAL TESTIMONIAL.

"Lansdowne House, Ryde, 9th August, 1876.

"The success which has attended your lectures in the Island pleases me much; increasing experience of the value of Magnetism, as a curative agent, as the Analogue of Odic force, gives me the conviction of there being a great future for Magnetism.

"If disease be essentially a disturbance of Nervous or Odic force, we require an agency to rectify such disturbances, and to supply what is deficient, and thus restore the balance of nervous power.

"We want for curative purposes bar magnets of sufficient size and power to produce speedy results.

"Wishing the 'Magneticon' success. Yours very truly,

"CHARLES LOWDER, M.D."

MEDICAL TESTIMONIAL.

"Falsgrave, Scarborough, 23rd August, 1876.

"I have attended your lectures on Magnetism and Health, and was much interested in them. I have also carefully examined your Patent Magnetic Appliances, and find that they are constructed on sound scientific principles. I am satisfied much benefit will result from their use, and shall be pleased to hear that residents and visitors in Scarborough are availing themselves of the opportunity of your brief visit to study a subject that promises to prove one of the most invaluable of curative agencies.

"I remain, sir, yours very truly,

"THOMAS F. PEIRSON, M.D.

"To Mr. Edgar Wetton, 48, Regent Street, London, W."

MEDICAL TESTIMONIAL.

"35, Upper Park Street, Clifton, Bristol, Feb. 5th, 1873.

"I have great pleasure in stating my opinion of your improved 'Magneticon,' which I believe will be found to be of great service in many diseases arising from impaired and weakened nerve force.

S. SMITH, M.R.C.S.E., and L.S.A."

"Ventnor, Isle of Wight, May 6th, 1874.

"On Mr. Wetton's recommendation, I commenced, nearly three years since, to wear 'Magneticon' Appliances. Almost immediately I experienced great benefit. My voice and sight have been much strengthened, and my general health has been greatly improved. Finding that I received so much benefit from Magnetism, I advised a friend to try the Appliances. As he also derived great benefit, I recommended them to others; and as they also reported favourably, I have always made it a rule to strongly recommend them to all sufferers. The satisfactory results that I have witnessed have in many cases been really marvellous. The recently patented 'Magneticon' Appliances, which I now wear, I consider invaluable. I shall be pleased to reply to any who may require further information.

"J. WILKINSON, Minister, Baptist Church."

SCIATICA.

"Chamberlain's House, Upper Castle Yard, Dublin, Jan. 7th, 1877.

"Entirely on Mr. Wetton's recommendation I commenced to wear the 'Magneticon,' having been suffering from Sciatica for some time, walking very lamely, and being so stiff that it was with difficulty I could bend down. I had not worn a Belt, supplied by Mr. Wetton, for more than a fortnight before I found the greatest benefit, and now, at the expiration of three months, am almost entirely free from all pain and inconvenience.

"I have no objection to reply to any person who may require further information. Mr. Wetton is at liberty to make what use he pleases of this certificate.

RD. W. BERNARD, Col."

"29 Pulteney Street, Bath, December 8th, 1876.

"I have much pleasure in stating that I have derived very great benefit from a Belt and Lung Invigorator which I purchased from Mr. Wetton some six months since. The benefit has continued, and I strongly recommend the Appliances to all sufferers.

"J. WHISTLER, Major-General."

GENERAL DEBILITY.

"Bath, March 1st, 1876.

"For some time I suffered from General Nervous Debility, but have derived much benefit from your 'Magneticon' Appliances.

"GEORGE TUDOR COOKE."

NERVOUS DEAFNESS AND NOISES IN THE HEAD.

"6, Home Mill Buildings, Trowbridge, Wilts, Oct. 4th, 1874.

"I must express my pleasure at the great benefit I have received from the use of one of your Spine Bands. I have been troubled for years with a nervous deafness and dreadful noises in the head; but before wearing the Spine Band three days I had received marked benefit in my hearing as well as my general health, and at the end of one week my hearing had been almost completely restored, and the disagreeable noises nearly removed. I have taken a large amount of medicine, and have been a martyr to nervousness, so that the timely relief seems almost miraculous. You can make what use you please of this communication for the benefit of others, as I am well known in Trowbridge, having lived here thirty years, and it may lead others to adopt the same remedy that has done me so much good in so short a time.

AUGUSTA MUNDAY."

RHEUMATIC GOUT.

"Darwen, Lancashire, February 20th, 1877.

"I have been wearing your 'Magneticon' Appliances some time, and found great benefit and relief from the pains I formerly endured from Rheumatic Gout. I shall feel extremely obliged if you will send me at once a Chest Protector of special power.

JAS. SUTCLIFFE."

GENERAL DEBILITY.

"School House, Maidencombe, Teignmouth, July 8th, 1874.

"Dear Sir,—Will you kindly send me one of your Magnetic Appliances —I should think a Belt? I've sent a Post-office order for £1 6s. Should I find benefit from wearing it, I will let you know. For ten months I've been suffering from General Debility.—Yours truly, ANNIE BURGOYNE." A Belt and Spine Band were eventually supplied. The following very pleasing letter was received two months later:—25, Brenton Street, Spring Gardens Road, Halifax, Nova Scotia, September 7th, 1874.—"Sir,—No doubt you will be surprised at seeing my handwriting coming from America; but here I am, and as I promised to let you know if your 'Magneticon' Appliances did me any good, allow me to say that I derived most marked benefit from them. I have not been so well for twelve months. I can truly say that, for a long time past, life has seemed to be mere existence; but now I can feel the electric force pervading my very nature, and consequently returning health and happiness. As a preventive of sea-sickness, too, I can recommend it. In crossing the ocean, which at the time was very rough, I did not feel sick more than once, and then only for about five minutes.—I am, Sir, yours truly,

ANNIE BURGOYNE.

"P. S.—You are at liberty to publish these facts."

SEVERE ACCIDENT.

"Cheltenham, August 12th, 1875.

"In January, 1873, I met with a severe accident (my right leg and spine were much injured, and my arm broken). For over two years I was quite unable to attend to business. When I came to you in March last I could not use my arm; but since wearing your Appliances I have derived so much benefit that I can now attend to my duties regularly. My leg I never expect will get better; but my arm I can use freely, and my back is quite well. My general health has also much improved.

"Those who know me are quite surprised at my recovery.

"ROBERT FOWLES,

"*Proprietor College Livery Stables.*"

NERVOUS AFFECTION.

"London Road, East Dereham, June 9th, 1875.

"I have been a severe sufferer from Nervous Darangement for twenty-eight years, and I hereby certify that I have derived more benefit from the use of your Magnetic Appliances, which I have now used for four months, than from all the medicine I had previously taken, and the amount was prodigious. It would be impossible for me to describe the alteration in my entire system, Suffice it to say that after many years of excruciating pain, I have at last discovered a remedy in your 'Magneticon,' which I conscientiously recommend to all afflicted with similar disorders. In conclusion, I offer you my sincere thanks.

"MARTHA HILLEN.'

ASTHMA, BRONCHITIS, AND LANGUID CIRCULATION.

"16 Lansdowne East, Bath, May 13th, 1876.

"We have now been using your Magnetic Appliances for some six months or more; and it is due to you to say that we all continue to derive benefit from them. For my part, I would strongly recommend the Chest and Lung Protector to all suffering in those most vital and delicate parts, because my wife's tendency to Cardiac Asthma, and mine to Bronchitis, have been very greatly alleviated by it. You were kind enough to give one of these Appliances, on my representation, to a poor woman, a very great invalid and sufferer from Asthma, and she tells us that she has derived great benefit from its use. Two of our children also, one having a very languid circulation, and the other a delicate chest, have been much benefited by the Appliances. Since your first visit to Bath I am glad to hear that some of our medical men are recommending 'the Magneticon,' and one of them is himself wearing the Appliances.

"Assuring you of the pleasure it gives me to write this testimonial, I am, yours faithfully, H. W. FOSTER.

"To Mr. Edgar Wetton."

SEVERE COUGH.

"26, Grove Street, Bath, February 29th, 1876.

"My wife, who has for years suffered from a severe cough and great tightness of the chest, has been very much benefited in a short time by your Appliances. J. LADHAMS."

CONTRACTED LEG.

"1, Belvedere Place, Bath, March 1st, 1876.

"About six weeks since I purchased a 'Magneticon' Appliance for my daughter, who has a contracted leg, and already I have had one inch taken off her high-heel boot (which is about six inches in depth), thus showing that the leg is a little straighter. In so short a time I think this is very satisfactory, and I trust that it will continue to improve. G. CROSS."

INDIGESTION, SLUGGISH LIVER, AND BILIOUSNESS.

"6, Kirby Place, Plymouth, May 6th, 1873.

"I have received considerable benefit from the use of the Magnetic Belt which I purchased from Mr. Hagarty about a fortnight ago. I have been a martyr to Indigestion and Sluggish Liver for a very long time. This has caused languor, palpitation of the heart, pains in the head, and a variety of other uncomfortable feelings consequent on these primary disorders. Magnetism had considerably relieved me; but owing to the inconvenience of the appliances I had abandoned their use. Your Belt, on the contrary, can be worn without the slightest inconvenience. I buckle it on in the morning, and allow it to remain till I return at night, without the slightest feeling of incumbrance.

"I may further add that I purchased a Belt for a friend of mine, who has received great benefit from its use. This Belt was used for relieving Nervousness in conjunction with Indigestion.

"WM. HARRIS."

SEVERE ACCIDENT, COUGH AND GENERAL DEBILITY.

"6, Glenfall Terrace, Cheltenham, June, 1875.

"Having derived great benefit from the use of 'The Magneticon,' and desiring to give such impressive testimony as shall induce many others to adopt so efficacious and comfortable a remedy, I now give a simple statement of my case. Some years ago I had an accident which resulted in a contraction of the muscles of my leg. The consequent weakness gradually increasing, I became very anxious, fearing it would end in total disuse of the limb. It was just at this time one of Messrs. Wetton & Co.'s pamphlets came under my notice. The extremity of my case caused me to be struck by it. I called at their depot in this town, and was there spoken to in a genuine way. The nature of my case being one always difficult of relief, I was candidly told there would be little probability of my receiving benefit; however, hoping against hope, I resolved to give Magnetism a fair trial. I wore two leg Appliances for a month, with little result. At the end of the second a decided improvement was perceptible. Now, after the lapse of six months, my experience is, that the strength imparted to my leg is permanent. My general health is also much improved. This I attribute solely to the use of a 'Magneticon' Lung Invigorator, from which I derived almost immediate benefit. I have been subject for years to indigestion, coughs, colds, and general debility, all of which ailments I am now entirely free from.

ELIZA DOWDING."

NERVOUS DEBILITY.

"13, York Street West, Stepney, London, E., Dec. 1st, 1875.

"Since writing to you last I have received still greater benefit from your 'Magneticon' Appliances. For years I have suffered from extreme nervous debility and exhaustion, and nothing seemed to do me any good, but I am thankful to say that since commencing to wear 'The Magneticon,' now nearly two years ago, I have enjoyed really good health. All those who formerly knew me have been greatly surprised at the marvellous change that has taken place in me.

"H. E. HUBBARD, City Missionary."

SPINAL COMPLAINTS, DISEASED KNEE, &c.

"In addition to the very great benefit I have derived from your 'Magneticon,' my wife and two children have also been greatly benefited. My wife, who suffered severely for twenty years from spinal complaint, was quite cured in a few weeks. My little girl (aged seven) was a weak, delicate child, but now that she wears 'The Magneticon' is comparatively strong and well. My stepson was discharged about five months since from the Haslar Hospital with acute rheumatism in the hip joint and diseased knee and arm; he was, in fact, quite a cripple; in a month he was quite cured.

"H. E. HUBBARD, City Missionary."

LAMENESS.

"6, Victoria Square, Clifton, February 12th, 1877.

"Gentlemen,—Please send me a Knee-cap. The one I had some time ago, and gave to a poor woman who was lame for two years, has quite restored her, and I have now a similar case.

JEMIMA LUCAS."

RHEUMATISM.

"8, Suffolk Square, Cheltenham, 15th Jan., 1873.

"For about four months I suffered very severely from rheumatism in my arm. Often the pain was most excruciating; and sometimes I was quite unable to sleep at night. The first day I put on the Magnetic Appliance I felt relief. In a very few days the swelling had gone down and I was almost free from pain, and have felt but little of it since. I can now use my arm freely, which I was quite unable to do for four months.

"E. MILLER."

LUMBAGO.

"Wilton House, Cheltenham, 18th Nov., 1876.

"Dear Sir,—Shortly after a very severe attack of lumbago which I had towards the end of last year, my attention was drawn to the proceedings of a committee of gentlemen for bringing the advantages of curative magnetism within the reach of the poor of Cheltenham, which induced me to try its effect. From that time I have worn a Magnetic belt, and I have had no return of lumbago—to which I had been subject for many years—and during the same period my general health has greatly improved. I am aware that no conclusive inferences in favour of these Magnetic Appliances can be drawn from these facts; but believing that the effects to which I have referred are fairly attributable to Magnetic influence, I have much pleasure in sending you my own impression on the subject, and in recommending it to others.

"I am, faithfully yours, WM. KEMEYS RIDDELL."

"Messrs. Wetton & Co., 98 High Street, Cheltenham."

COLD FEET.

"52 Carlton Street, Kentish Town, N., 4th June, 1874.

"For years I have suffered much, both in summer and winter, from cold feet. Your patent 'Magneticon' Socks, which by the way are most comfortable to wear, have infused into them such a continuous glow of warmth that I have not suffered in this respect since.

"SARAH JUDD."

"3 Oak Villas, Derby Road, West Croydon, 12th Feb., 1875.

"I have the pleasure of informing you that the Magnetic Appliances have proved highly beneficial. To use my sister's own words, they have been the means of saving her life. Were their merits more generally known, many others would, no doubt, be induced to make a trial—experience will prove the rest.

JAMES CLARK."

PARALYSIS.

"Walford Cottage, Alstone, Cheltenham, July 21st, 1876.

"For nearly four years I have suffered from the effects of a Paralytic Stroke. When I came to you in March last my right arm was but little use, and my right knee was very weak and painful. The treatment at your Magnetic Room quickly relieved the pain, and I was soon enabled to be at work again, which I had not been for three-and-a-half years previously.

"I am thankful to say that wearing your Appliances, with an occasional visit to the Magnetic Rooms, has not only enabled me to work hard, but my arm and leg have steadily improved from that time.

"WILLIAM COULSTON."

"King Street, Margate, Nov. 23rd, 1875.

"Gentlemen,—Some months since your 'Magneticon' Appliances were recommended to me by a lady friend, for my little one, then fifteen months old. She was exceedingly weak in body and limbs, her back especially, which latter projected, as if deformed, when placed in a sitting posture. She cried when moved, as if the motion caused pain, her breathing was painfully difficult, she could not retain anything on her stomach, slept badly, and had for weeks being living on moistened biscuits. Within a week from wearing the Chest Protector and Spine Band you sent me, she could eat proper food like other children, and can now sit alone, sleeps well, is the most lively of children, and although naturally backward, promises to be as strong and healthy as any one could wish. Age now eighteen months. The relief to her chest, as regards breathing, was apparent in a very short time. My gratitude for the restored health of my child leads me to write this letter, which you have my full permission to publish as a testimonial.

"CHAS. J. BUCK."

"P.S.—I would add that before wearing 'The Magneticon' my child lay all day upon her back, and when taken out of doors reclined on a board in the perambulator."

"Bath Road, Cheltenham, 24th August, 1874.

"I am glad to say your Appliances are doing me good. I am able to walk much better these last few weeks, and I hope soon to get strong again, as it is now twelve months since I was able to work. I am pleased to say I am now able to write, as I am not so nervous as I was. You may use this as a testimonial, if you think proper, with my initials.

"J. S. B."

PARALYSIS.

"179 Dover Road, Folkestone, April 20th, 1875.

"I have been wearing your 'Magneticon' for a year past now, and it has wonderfully improved my health and strength. A. H."

PARALYSIS.

"1, Bandon Place, Cheltenham, October 20th, 1876.

"I have much pleasure in informing you that I have derived great benefit from your Magnetic Belt. I have now worn it a year and nine months, and I would not be without it a day on any account, having suffered from Paralysis for nearly two years. The benefit I have derived is wonderful. I can greatly recommend your appliances to any suffering from Paralysis; they have a wonderful effect on the spine.

"THOMAS MILLS."

RHEUMATISM.

"25, Priory Street, Cheltenham, July 26th, 1875.

"I have great pleasure in testifying to the great benefit I derive from using Wetton's Magnetic Appliances. I was suffering from Rheumatism in my knees in 1872 when they were recommended to me. In a very few days I found my knees become strong and all pain gone. I continue to wear the Appliances. C. W. HODSON, Lt.-Col."

LOSS OF VOICE, NERVOUS WEAKNESS, AND SLEEPLESSNESS.

"Park Terrace, North Tawton, North Devon, 17th July, 1874.

"Before wearing your 'Magneticon' Appliances I had long been in a low, weak state, and suffered from loss of voice, extreme nervous weakness, and inability to sleep. I am now so much better that I feel almost well; and my friends are as much surprised as they are pleased at the great improvement that has taken place in my health.

"S. S. WILLIAMS."

"Italian Villa, Leckhampton, 12th May, 1875.

"Since wearing your 'Magneticon' Appliances, my general health has been very much improved. FREDK. STEPHENSON."

LIVER COMPLAINT, HEART DISEASE, AND SEVERE COLD.

"Walcot Villa, Swanmore Road, Ryde.

"My friend in Edinburgh, for whom I purchased a 'Magneticon' Appliance for liver complaint, heart disease, and severe cold, has derived marvellous benefit. On Dr. Lowder's recommendation I have worn the Appliances myself, and derived much benefit. I was a sufferer from nervous exhaustion.

M. TURTLE."

PARTIAL PARALYSIS.

"St. James' Parade, Cheltenham, Nov. 10th, 1876.

"I have suffered from infancy from Partial Paralysis in my right arm. Through the help of a kind subscriber I was able to purchase a Magnetic Appliance. From this, and the treatment I received at the rooms, I have derived great benefit.

ANNIE KEEN."

SEA-SICKNESS.

"S. S. *Windsor Castle*, off Dartmouth, 14th April, 1875.

"We had very rough weather coming down the Channel, yet I have not been sea-sick. 'The Magneticon' has done more for me than I could have hoped. You are at liberty to publish this. Will write again on my arrival at the Cape.

M. BENNETT."

"S. S. *Windsor Castle*, off Cape of Good Hope, 18th May, 1875.

"Although we have had several rough days on the passage out I have not been sea-sick once. Your Magnetic Appliances appear to possess the power of warding off sea-sickness altogether. M. BENNETT."

DROPSY AND PLEURISY.

"42, Townsend Street, Cheltenham, 17th Nov., 1876.

"I beg to return you my sincere thanks for the way in which your Magnetic Belt has done me good. After suffering with Dropsy and Pleurisy for five months, I was recommended by a friend to try your Belt. Being very weak, I suffered from great pain across my back, which caused me when walking to be nearly double. In a week I found relief, and in a month I was as good as well.

"I shall be pleased if you will publish this for the good of others, who I hope will benefit as much as I have done.

E. MILLARD."

ASTHMA.

"Sutton, near Birmingham, 20th February, 1875.

"I am pleased to inform you that my son has found infinite benefit from your various Magnetic Appliances. JAS. BLANCKENHAGEN."

INDIGESTION AND GENERAL DEBILITY.

"66, St. John Street, Perth, 24th May, 1877.

"Sir,—Seeing by your advertisement in the *Perthshire Constitutional* that you are paying a short visit to Perth, perhaps you will be interested to know that I purchased a 'Magneticon' Belt from your firm (Messrs. Wetton & Co., London) some eighteen months since, having suffered extremely from Indigestion and General Debility, and that in a day or two after wearing it I commenced to feel its beneficial effects in renewed health and spirits. The improvement continued till I found myself quite well in a few weeks, and since then I have never had a recurrence of my illness, and I may say nothing would induce me to discontinue the use of the Belt.

"If the above facts are of any service to you, you are at liberty to make what use of them you please for the benefit of the public.

"I am, yours respectfully, J. S. CRUICKSHANK."

EXTREME WEAKNESS AND INDIGESTION.

"Cintra Cottage, Fairview, Cheltenham, Feb. 5th, 1876.

"It is with pleasure that I inform you of the improvement in my health since wearing the Lung Invigorator and Belt, and taking advantage of the Magnetic Room. You are aware of my extreme weakness on my first sitting in the Magnetic Room, the night previous to which I had four attacks of night-perspiration; the night following I had only one, and have not had any since. My digestion is wonderfully improved, and I feel much stronger in myself, so that I hope soon to go to my employment again. E. T. HAINES."

SPINAL WEAKNESS.

"Newport, Isle of Wight, 11th Dec., 1873.

"I have much pleasure in testifying to the great benefit I derived from the 'Magneticon' Spine Band you supplied me with a week ago. For more than a year I have suffered from weakness in the back; the pain increasing in the evening, and after any exertion; but within two or three hours after putting on the band for the first time I felt so strengthened and supported by it, that I was not in the least tired or weary after having had what would otherwise have been a very tiring day; and not only has the pain quite left me, but my health is much improved and invigorated by it. I have now just returned from a walk of fourteen miles, feeling very little fatigue, which a week ago I could not possibly have accomplished. I shall ever bear the strongest feelings of gratitude towards Mr. Hagarty for being the means of the benefit I have gained, and shall take every opportunity of recommending to my friends your valuable 'Magneticon.' MARY E."

"P.S.—Although I have not given my name in full for publication in your pamphlet, you may supply it to any one desiring further information, and I shall cheerfully answer any questions."

LUMBAGO, &c.

"Riding School and Private Livery Establishment,
Cheltenham, August 25th, 1875.

"I have very great pleasure in bearing testimony to the great benefit I have derived from wearing 'The Magneticon' Belt and Chest Protector. H. G. ENGLISH."

INDIGESTION.

"23 Mill Street, Ventnor, Isle of Wight, 7th Oct., 1873.

"By the advice of Dr. Woodford, I have lately been wearing one of your Magnetic Belts. You will be pleased to hear that I have derived much benefit from its use. For some time past I suffered from indigestion, but now feel comparatively well. E. VINALL."

INDIGESTION.

"Claremont, Promenade, Southport, 13th January, 1877.

"For years I have suffered very severely from Indigestion, but since wearing one of your Belts (now two months since) have been quite well.
"THOMAS BLUNDELL, *Gardener.*"

"Tiverton Terrace, Bournemouth, January 2nd, 1877.

"Sir,—I have suffered from very great weakness for many years past, and after buying one of your 'Magneticon' Appliances, I have found very great benefit in the course of a fortnight. F. SPREADBURY."

EXTREME DEBILITY.

"Rushfield House, Darley, near Ripley, 27th Oct., 1876.

"It is nineteen months since mamma began to wear the Appliances, and I am daily confirmed in the assurance of their health-giving properties. The improvement which resulted from the first application of these garments was simply wonderful. In three days it was a new life from the verge of the grave, and since then she has found by the use of added Appliances speedy and essential relief from paralytic tendencies and seizures, to which for upwards of twenty years she has been more or less subject. With an illness thus prolonged, in which, even in the seasons of her greatest amendment, she has ever required constant care and tender attention, and with more than seventy years of her life already gone, I cannot expect her to regain *vigorous* health, but *I know* that she is materially *better* in health and spirits, and suffers considerably less from the sensation of cold and from pain when wearing the Magnetic Appliances, than when their influence is removed; and to the restoring influence of Magnetism I quite attribute her spared life at the present time, while I trust, with the continued blessing of our gracious God upon this curative agency, that many years of tranquil enjoyment may yet be given to her. Personally, and for other members of the home circle, as for friends far and near, I can confidently speak of the soothing, refreshing, healing, and exhilerating powers of your 'Magneticon' Appliances—to us they have become household treasures.
"SARAH J. HAWKSWORTH."

RHEUMATISM AND GENERAL DEBILITY.

"45 High Street, Alloa, June 15th, 1877.

"I have been a sufferer from Rheumatism and General Debility for some years, and since January last have been almost wholly laid aside, and unable to follow my business. Being advised to purchase one of your Magnetic Belts, I did so about ten days since, and am now so much better that I have every confidence in your Appliances; and should recommend all who are suffering from similar complaints to apply to you. I have much pleasure in requesting you to make this known to the public. DAVID EASTON, *Auctioneer.*"

LIVER AFFECTION AND RHEUMATISM.

"Union Street, Ryde, 16th June, 1876.

"Having suffered for some years from Liver Affection and Rheumatism, I tried your Magnetic Appliances and was greatly benefited by them, and several members of my family have also derived benefit from your Appliances, therefore I feel great pleasure in recommending so valuable a remedy. W. NORMAN, *Grocer.*"

"4 Melville Street, Ryde, June 14th, 1876.

"I have much pleasure in stating that since wearing one of your 'Magneticon' Knee-caps I have been quite free from rheumatic pains.

"HENRY COLENUTT."

SLEEPLESSNESS.

"Cheltenham, October 21st, 1873.

"For some time I suffered a great deal from want of sleep, through the overwrought state of the nerves, brought about by great anxiety and fatigue. One night, after I had lain awake for several hours, I thought one of your 'Magneticon' Appliances which I had might do me good. I at once bound it round my head. In a few minutes I felt I was under the soothing influence of Magnetism, and was soon asleep. In the morning I awoke, after a sound sleep, much strengthened and refreshed. Since then I have often tried 'The Magneticon,' and have almost always found it an unfailing remedy in inducing sleep—not that dull, heavy sleep produced by laudanum and other such narcotics, but the refreshing, invigorating rest enjoyed by those in health.

"E. S. P."

"P.S.—You are at perfect liberty to publish this testimonial; and also to give my name and address to any one who may wish to make further inquiries."

RHEUMATIC FEVER.

"St. Paul's Cottage, Larput Place, Cheltenham, Nov. 22nd, 1875.

"When I decided a few months ago to try if your Appliances would benefit me, I was in a sad state of suffering, the result of rheumatic fever. My ankles were much enlarged and very painful, I could only walk a little by the help of a stick, and that with great difficulty. Your 'Magneticon' has quite cured me, and I feel great pleasure in sending you this acknowledgment as a testimonial. A. CURTIS."

SWOLLEN NECK.

"5 Hastings Street, Plymouth, 8th May, 1873.

"For three years past I have been suffering from a swelling in the neck, which, as it was evidently growing larger, I had quite begun to despair of its being removed. I have tried all kinds of remedies in France, Switzerland, and England; medical men having apparently exhausted their skill. Having attended Mr. Hagarty's lectures, and heard him speak of the good effects of Magnetism, I obtained a Magnetic Appliance; and although I have only used it about a fortnight, I find the swelling sensibly diminishing and the cramped feeling of the throat entirely removed. I had much difficulty in breathing, and that is also much easier; so that I feel confident that I have at last found what I have long sought in vain, and hope that others may be led to try your 'Magneticon.' You will kindly not publish my full name, as my friends would not care for my doing so; but I will cheerfully answer any enquiries respecting my case.

M. L. C."

"57 Cowgate, Dundee, June 20th, 1877.

"Dear Sir,—We are so much astonished at the miraculous cure which my wife has derived from wearing your Appliances that we cannot state on paper the pleasure and joy we have received through them. She says herself that she never felt better than now in her life; and, indeed, the great difference wrought upon her cannot be conceived, for instead of going about with a perpetual headache, and in a state of great weakness, she can now manage her household duties lightly and cheerfully. In short, what was before a burden is now a pleasure. The faintness and weakness of the heart, of which we spoke to you, have completely gone, and we can say no more than that she is completely renewed in health and strength, and can only wonder that no medicine which she has taken during the last six years (and she has been under the treatment of some of the most renowned physicians in Scotland) has ever had the slightest effect for the better upon her. We desire to thank you heartily for this marvellous restoration to health, and as our desire is, in gratitude, to bring many sufferers to the source of Cure and relief, you are at liberty to make what use you please of this letter.

"We are, dear sir, yours truly, "A. ANDERSON,
"JEANNIE ANDERSON."

"Plymouth, Oct. 11th, 1875.

"You will remember last April you supplied me with a Belt and Band for my dear wife, who has worn them ever since, and I am truly thankful to say, under God's blessing, she has received wonderful benefit. She can now walk out, and is comparatively strong, and free from those severe pains in her back, and prostration by the relaxation of the nerves, which compelled her to be lying down a good deal of her time the last six years, which she need not do now beyond one hour altogether throughout the day. I can truly say it seems to be the only thing of many she has tried that has given us any encouragement to hope for recovery.

F. C. G."

NERVOUS EXHAUSTION.

"8 Bold Street, Southport, Jan. 31st, 1877.

"For nearly my whole life I have suffered from extreme nervous exhaustion and depression of spirits, for which I could get no relief till I tried your Magnetic Appliances; and having worn a Belt and Chest Protector for three months, I am able to say I am a great deal better, although I am in my 78th year. SARAH HOLDING."

"48 Pyle Street, Newport, Isle of Wight, Jan. 30th, 1877.

"I have been a very great sufferer for eighteen years from internal complaints, getting but very little sleep, and so weak that I could hardly move about in the summer, and never look out of doors in the winter. I am very thankful that I have tried your Appliances; I felt better soon after wearing them, that was in July, 1876. I still keep better, my voice is stronger, and I can walk three or four miles and not feel tired, when the weather is fine, which I have not done these eighteen years at this time of year. I am so much better that many can hardly believe I am the same person. I am very thankful that I was induced to try your Appliances. MARY CHEVERTON."

"P.S.—I can now sleep well, and am free from pain. Before wearing your Appliances I could not walk half a mile without feeling very tired."

"143 Gloucester Road, Regent's Park, Feb. 20th, 1877.

"Having derived great benefit from the use of Mr. Wetton's Appliances after wearing them a few months, I shall have much pleasure in recommending their use to others, as I believe them to be invaluable. My general health has been greatly improved, and my voice much strengthened. F. J. R."

LASSITUDE AND LOSS OF APPETITE.

"4. Laws Terrace, James Road, Darlington, September 6th, 1877.

"Dear Sir,—I am glad to say that since wearing the Belt which I procured from you on your former visit, my appetite has much improved, and I have been quite free from the weary, tired feeling which clung about me so continually before. I can attribute this to nothing but the influence of Magnetism. M. A. BARRON."

SEVERE COUGH, &c.

"Hill Park Crescent, Plymouth, July 19th, 1877.

"Twelve months ago I purchased a Lung Invigorator and Belt, and am glad to say that the benefit I derived from them is wonderful. During the winter of 1876-77 I have been entirely free from a cough which had formerly been very troublesome, and was caused by inflammation of the bronchial tubes. I have also been able to do without cod liver oil, which had cost me about £4 or £5 per year. Anyone who suffers from a complaint such as this I should strongly recommend to try the 'Magneticon.' I shall esteem it a pleasure if you will make this known, and will, with pleasure, answer any questions.

"HENRY LOVELESS."

RHEUMATISM.

"8, Peppercorn, Kendal, March, 1877.

"I suffered from rheumatism for twelve months, and having worn one of your Belts for about three weeks, I am now entirely free from that complaint. S. A. ELLIS."

"9, High Street, Dumfries, N.B., June 7th, 1877.

"For four years I suffered very much from internal rheumatism, for which I could get no relief until I purchased one of your Magnetic Belts, together with a Lung Invigorator, which on the very first night of wearing did me a great deal of good; and now, having worn them two months, I am free from all pain, and feel almost as well as ever I did in my life. NICHOLAS HOLDEN, *Stocking Maker.*"

"82 and 83 Northgate, Darlington, Sept: 7th, 1877.

"Dear Sir,—I have suffered for NINE YEARS from Rheumatism of the Chest, but since wearing your Lung Invigorator, procured during your last visit here (now two months since), have not had the SLIGHTEST RETURN of the pain. "I am, Sir, yours truly,

"J. FOSTER."

BILIOUS HEADACHE.

"Brixham, March 30th, 1877.

"I have much pleasure in testifying to the great benefit I have derived from wearing your 'Magneticon' Belt supplied me a short time since. I had been for many years a great sufferer from a bilious headache, which quite prostrated me once a week, so that I could not attend to my business for the day. I have now worn the Belt and the Cap morning and evening, for, I think, about six weeks, and have only had the headache once; and my general health is greatly improved. I should not like to be without it for anything. W. G. TULLY."

SPINAL DISEASE.

"11, Arden Street, Darlington, Aug. 23, 1877,

"Dear Sir,—On your visit to Darlington in June last I procured one of your Magneticon Belts, the effect of which has so far exceeded anything I had hoped for, that I desire in gratitude and for the sake of other sufferers, to make it known. More than twenty years since my spine was injured by a fall from an omnibus, since which time my life has been almost a constant burden. For many years I have been quite helpless, and have suffered much pain. The first day of wearing the Belt I found the pain relieved—and have so rapidly gained in strength since then as to be a constant marvel to myself and to those about me.

I cannot sufficiently thank you for the benefit I have received, but gladly give you permission to make use of this as you please. I may also say that my daughter is much stronger by wearing the Spine Band and I have heard your appliances highly spoken of by others who procured them during your visit. Trusting you may be equally successful in other towns.

'I remain, yours very truly

"JANE TODD."

"19, Northgate, Darlington, Sept. 6th, 1877.

"Dear Sir,—I have much pleasure in testifying to the gratifying results of the application of your Magnetic appliances. I have for some years suffered from Liver Complaint, which became very painful. I was induced to try the Magneticon Belt, which you supplied me with on your former visit, and which has proved of great advantage in my case. During the few weeks I have worn it the pain that I suffered has gone, and my general health has improved. I may mention that a friend of mine who was induced to try one of your Belts (Mrs. Dowson) named to me a few days ago that she had received a great deal of good from the Belt you supplied her with. You are at liberty to use my case in any manner you please if it will serve the public good, and I shall be glad to answer any questions, at any time, with regard to the results of my own case.

"I am, dear Sir, yours truly,

"WILLIAM BOLTON."

WEAKNESS.

"Bethelfield Place, Kirkcaldy, 14 Jan., 1878.

"Dear Sir,—Having suffered for over five years from a weakness and pain in my right side and frequent pains in my head, and during that time was frequently laid aside with the violent pain in my side, I called to consult you when in Dunfermline last June.

"No promise was made on your part of my getting entire relief, but you advised a belt as sure to soothe the pain and improve my general health; and now I am glad to inform you I have little trouble from the pains and weakness in my side, and a headache is now one of my rarest *complaints.*

"My general health is also much better than it has been for many years. I was a little doubtful of the 'Magneticon' at first, but now, having derived so great benefit myself, I very heartily commend to others, 'Magneticon as a curative agent.'—Yours very truly,

"D. LAMONT."

SEVERE CASE OF ASTHMA, LIVER COMPLAINT AND GENERAL WEAKNESS.

"1 Robertson Street, Glasgow, 20th Nov., 1877.

"Dear Sir,—I feel it no more a pleasure than a duty to inform you that the 'Magneticon' Belt and Lung Invigorator which I purchased from you in Dundee some two months back, have, I may state, entirely restored me to health. Previous to wearing them I had tried almost everything that is known for the cure of the complaints from which I suffered, but none of them were of any avail; and I even came to you without the slightest hope of deriving any benefit. It, however, gives me great pleasure and satisfaction to be able to inform you that my health is now thoroughly restored, and that I am quite a different man to what I was before wearing your Appliances, and to what I had been for many years past. I, therefore, have much pleasure in allowing you to use my name, or to publish this letter wherever you think it may be of any good to the public; and with best thanks,

"I remain, yours truly, JAMES WILKIE."

THE MAGNETIC ROOM,

CHELTENHAM, ENGLAND,

Under the Patronage of

The REV. CANON BELL, Rector of Cheltenham.
The REV. J. A. ASTON, M.A., Vicar of St. Luke's, Cheltenham.
The REV. A. MORTON BROWN, LL.D., Minister of the Congregational Church, Cheltenham.
JAMES TYNTE AGG GARDNER, Esq., M.P. for Cheltenham.
LIEUT.-COL. C. W. HODSON, Cheltenham.
CAPTAIN ST. CLAIR FORD, J.P., Cheltenham.

Consulting Surgeon.

THOMAS J. COTTLE, Esq., M.R.C.S.

AT our Magnetic Room in Cheltenham we employ a system of special Electric treatment that is yielding results of the most gratifying nature. Sufferers who have been unable to obtain relief by other means, have derived unlooked-for benefit, In many severe cases of Paralysis, General Debility, Rheumatism, Gout, Neuralgia, and Spinal Weakness, we have been singularly successful.

Cheltenham being a health resort, those who come from a distance will have no difficulty in obtaining comfortable apartments, on reasonable terms, during the time they are under treatment.

In our Magnetic Room the Settee, Couch, Easy-Chairs, and Footstools are charged with Magnetic force of different degrees of power. As patients sit or recline on these, they are enveloped in a Magnetic atmosphere that generates in the system those electric currents on which life and health depend.

Magnetic and Electric treatment is also given in private rooms, at a slight extra charge.

"MAGNETICON" APPLIANCES.

The special advantages of our Appliances, as curative agents, are, that they are made of a light, elastic *material, and generate Electricity without the aid of Voltaic Batteries, Metallic Plates Chain Bands, or Acids;* they give no Shocks, *and* cause no sores, *and as the magnetic current passes readily through an intervening garment, contact with the body is not necessary, while their soothing, healing, and strengthening properties are very quickly apparent wherever worn.*

The following are some of the many diseases in which our Magnetic Appliances will effect a cure, or afford permanent relief:—Gout, Rheumatism, Lumbago, Neuralgia, Sciatica, General Debility, any form of Internal Weakness, Epilepsy, Dropsy, Biliousness, Thick Neck, Loss of Voice, Languor, Diarrhœa, Nervousness, Asthma, Palpitation of the Heart, Congestion of the Lungs, Enlarged Tonsils, Hysteria, Erysipelas, Paralysis, Indigestion, Incipient Consumption, Loss of Appetite, Bronchitis, Sort Throat, Cutaneous Diseases, Headache, Pleurisy, Croup, Tumours, Constipation, Deafness, Wakefulness, Spinal Debility, Ague, Sprains, Quinsey.

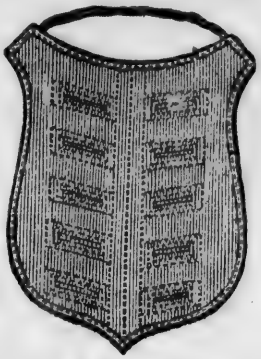
FORWARDING.

The Magneticon Appliances are forwarded by Post or Express to any address on receipt of price, either in registered letter or by Post Office Order, payable to THOS. J. MASON, Toronto, Canada.

Committees of Hospitals and Charitable Institutions, and those who purchase for gratuitous distribution among the suffering poor are always supplied at reduced prices.

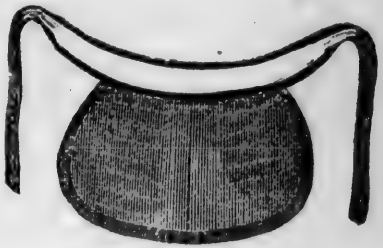
PATENT MAGNETICON APPLIANCES.

CHEST PROTECTOR.



$1.50, 2.00, 2.50, 3.00, and 4.00.

THROAT PROTECTOR.

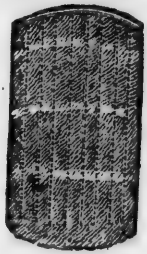


$1.50, 2.00, 2.50, and 3.00.

SPINE BAND.

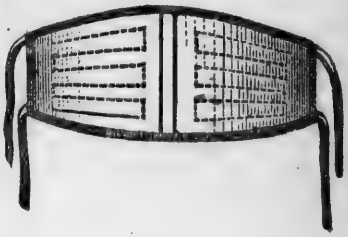
$1.50, 2.00, 2.50, 3.00, 4.00, and 5.00.

FRICTION GLOVE.



$1.50, and $2.00 per pair. Singly, 75c. and $1.00.

STOMACH APPLIANCE.

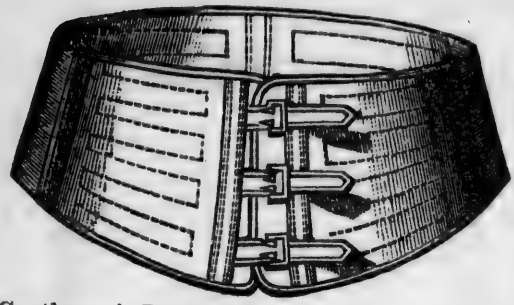


$2.50, 3.00, and 4.00.

The prices of all our Appliances are arranged, in each class, according to their Magnetic Power. In some cases it is necessary to wear Articles of SPECIAL POWER; these can be had at proportionately increased prices. The most powerful Appliances are $15.00 each. *(See page 32.)*

PATENT MAGNETICON APPLIANCES.

GENTLEMEN'S BELTS.



Gentlemen's Belts, $4.00, 5.00, 6.00, and 7.50

KNEE CAP.

$1.50 and 2.00 each.

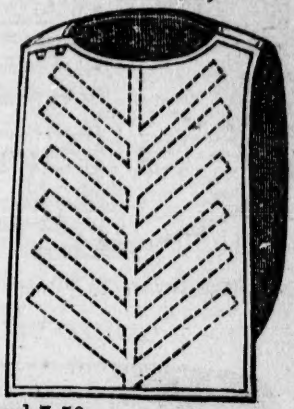
LEG APPLIANCES, $2.00, 2.50, 3.50, and 5.00.
ARM APPLIANCES, $2.00, 3.00, and 4.00.
STOMACH APPLIANCES, $2.00, 3.00, and 4.00.
MAGNETIC AIR PILLOWS, $10.00 and 12.50.

☞ In ordering Belts, it is important that the Measurement round the waist be sent.

PATENT MAGNETICON APPLIANCES.

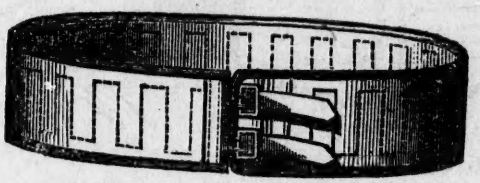
LUNG INVIGORATOR.
(Front view.)

LUNG INVIGORATOR.
(Back view.)



$4.00, 5.00, 6.00, and 7.50.

SUMMER BELT.



$3.00, 4.00, 5.00, 6.00, 7.50.

MR. THOMAS J. MASON,

Messrs. WETTON & Co.'s American Manager,

Who has had a large experience in England in the application of Curative Magnetism, will afford every information to those desirous of obtaining additional particulars.

All communications to be addressed to him at 147 CHURCH ST., TORONTO, CANADA.

SPECIAL POWER APPLIANCES.

ONE of the great advantages of our Magnetic Appliances is their extreme LIGHTNESS. This enables us to make up articles of *special power* to meet extreme cases. Loss of health is caused by the blood and nervous force being in a measure deprived of their Magneto-Electric power. By the wearing of Magnetic Appliances, additional magnetic currents are soothingly infused into the system, thus giving a better circulation, together with greater purity of the blood and increased nervous action. It must, therefore, be apparent to all that where there has been great loss, much additional power is necessary.

SPECIAL POWER PRICE LIST.

CHEST PROTECTORS, $5.00 and 6.00.
THROAT PROTECTORS, $4.00 and 5.00.
SPINE BANDS, $6.00, 7.00, and 8.00.
